MONACO ADVANCED FACIAL AESTHETIC MASTERCLASS

The Monaco Advanced Facial Aesthetic Masterclass is aimed at **high-level, discerning doctors** in aesthetic medicine. The main objective is to deliver exclusive, advanced knowledge of clinical anatomy combined with advanced injection techniques for safe and optimal results.

This year, the main focus of the masterclass is **combination and regeneration** through the prism of anatomy, live injections, and interactive discussions.

The masterclass will include:

ANATOMY

A deep dive into the anatomy by zones and layers of the face, focusing on the safety of facial treatments.

FULL FACE TREATMENTS

Advanced injection techniques emphasizing safety, patient selection, appropriate treatment options, and pre- and post-treatment care. Carefully selected models will be analyzed.

COMBINED TREATMENTS

Do's and don'ts in mixing treatments and products. Guidelines on product selection and suitability for patients.

REGENERATION

Latest updates on regenerative medicine pearls and follow-ups on previous developments.

BUSINESS INSIGHTS

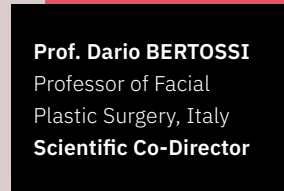

The main focus of this lecture is to understand the future direction of aesthetic medicine.

THE AGING FACE: MYTHS, DREAMS & REALITY

CHAIR: Hema SUNDARAM | MODERATOR: Maurizio CAVALLINI

- Welcome and session overview including learning objectives Hema SUNDARAM
- Introduction: Nonsurgical paradigms and paradoxes Maurizio CAVALLINI, Hema SUNDARAM

Our entire pantheon of nonsurgical rejuvenation is founded on certain assumptions. Time and experience have proven some to be valid... and some to be fallacies with significant consequences for our patients. Join us for a deep dive into current nonsurgical thinking and practice—what's real, what needs further investigation, and where we may be merely living a dream!

THREADS: MYTHS, DREAMS & REALITY

- Video presentation: Threads - The line of truth

Naci CELIK, Thomas RAPPL

Lifting, shaping or mobilization—what can threads truly achieve in the aging face? How can we distinguish and categorize the effects of permanent and resorbable threads— an ace in the sleeve of surgeons and injectors, a valuable adjunct, or a short-lived fantasy? Is this a mechanical intervention, a functional restoration, or both? Let's examine the science, selection and techniques of threads to understand their role in today's surgical and nonsurgical rejuvenation strategies.

- **PANEL DISCUSSION** with audience Q&A

ANATOMY: MYTHS, DREAMS & REALITY

- Video presentation: Anatomy - The midface conundrum

Dario BERTOSI, Dalvi HUMZAH

Fat compartments are pivotal to our notions of nonsurgical rejuvenation, with the midface as the paradigm. But when is a compartment truly a compartment? With the possible exception of the SOOF, is there any deep or superficial space in the face that is capable of restraining or mechanically holding within itself an implanted injectable? In reality, facial fat compartments are connected spaces. If deep compartments are overfilled and the contents readily move into other spaces, is this product "migration", or anatomically expected displacement? Likewise, with superficial compartments (if they truly exist): Should we be surprised if interconnected spaces and close proximity of the SMAS lead to product displacement and intrafascial entrapment? Let's take a step back and explore the reality of deep and superficial midface anatomy.

- **PANEL DISCUSSION** with Audience Q&A

INJECTABLES: MYTHS, DREAMS & REALITY

- Video presentation: Injectables - The magic needle?

Tatjana PAVICIC, Christian SUBBIO

Can Injectables ever truly rejuvenate, or do they simply beautify by restoring contour, shape and balance? What's the evidence for claims of collagenesis with both fillers and toxins, and is there a scientific basis for injectable biostimulation or bioregeneration? Surgeons and non-surgeons are duelling over the relationship between injectables and surgery for the aging face: Are they best sequenced, combined... or kept as far away as possible from each other?

DEVICES: MYTHS, DREAMS & REALITY

- Video presentation: Nonablative rejuvenation - Is this real?

Valeria CAMPOS, Klaus FRITZ

How many nonablative devices have studies with sufficient post-procedural follow-up to differentiate true results from the vestiges of post-procedural edema? Is there real evidence for collagenesis and elastogenesis as key components of a structural and functional regenerative process, rather than a short-term wound healing response? How is evidence-based practice impacted by a world of back-to-front marketing—where new devices are promoted first to consumers to generate a call-to-action for practitioners to buy, buy, buy?

New clinical study results reveal the combination of Neo Elite 650-microsecond 1064nm laser and Era Elite 300-microsecond 2940nm laser combined in a single treatment effectively stimulates collagen production, enhances skin texture, and improves skin vascularity with minimal downtime.

Early initiation of such treatments (around age 35) may yield the most substantial benefits.
