ADVANCED FACIAL AESTHETIC MASTERCLASS

This full-day immersive course combines expert-led lectures, live demonstrations, and engaging panels to deliver comprehensive clinical insights into contemporary facial aesthetics.

COURSE OBJECTIVES

Participants in this masterclass will:

- **Deepen Anatomical Knowledge:** Gain expertise through focused, zone-based lectures.
- **Refine Techniques:** Improve injection skills via expert-led live demonstrations.
- **Explore Strategic Treatments:** Learn about combination therapies and regenerative innovations.
- **Network:** Connect with global leaders in dermatology, plastic surgery, and facial rejuvenation.
- **Enhance Practice Management:** Acquire essential business insights to maintain competitiveness.

CURRICULUM HIGHLIGHTS

Four essential pillars of the masterclass:

ANATOMY & STRUCTURAL MAPPING

A deep exploration of facial layers, vasculature, and danger zones to ensure injection safety.

FULL FACE ASSESSMENT

Structured patient analysis and strategic planning designed to achieve natural, balanced outcomes.

LIVE INJECTIONS

Expert-led demonstrations enriched with anatomical insights. Zones covered: Temple, Nose, Periorbital, Cheeks, Jawline, and Lips.

REGENERATIVE AESTHETICS

Advanced Biostimulation: Exosomes, PN & Synergistic Therapies.

AESTHETIC HEALTH*A collaborative invitation to a new multidisciplinary paradigm***Caline MAJDALANI*****THE CONTEMPORARY CHALLENGE**

Beauty holds a genuine power — a magical promise of success, happiness and love. This power is real and scientifically proved. But the digital era has fundamentally altered our relationship to self-image.

The mirror, once a strong instrument of self-knowledge, has mutated into a screen, a powerful digital comparison and distortion tool. Pictures, once reality witnesses have become self-ideal productions. Entire generations compare themselves to faces, new standards of beauty self-edited and AI-generated.

The confusion between the ideal self and prevailing digital norms has led to shrinking and insecure selves, appearance absorbed, in an era of infinite images and controlled digital identities.

With the huge advancement of technology and regenerative sciences, aesthetic medicine practitioners—including plastic surgeons, maxillofacial surgeons, dermatologists, and aesthetic physicians—are increasingly on the front line of emerging psychological and societal challenges.

They are often the first point of contact for young patients seeking aesthetic transformation. These demands, often immature or impulsive, are frequently shaped by social media filters and fleeting beauty trends, diverging from classical aesthetic standards. As if aesthetic procedures offered a magical fix for physical flaws or underlying emotional discomfort.

The increasing rejuvenation of patients is a concerning signal, particularly as psychiatric comorbidities (including depression) and suicidal thoughts are emerging at progressively younger ages.

As gatekeepers of both physical transformation and psychological impact, you must navigate not only anatomical feasibility but also the emotional and cognitive drivers underlying such requests.

Hence, you need:

- a multidisciplinary, ethically grounded approach
- that integrates aesthetic expertise with psychosocial care
- to ensure responsible medical responses
- and prevent risks such as exacerbated depression, distorted self-image, behavioural addictions, suicidal ideation and suicidal attempts.

AESTHETIC HEALTH – THE HOLISTIC APPROACH ANSWER

Aesthetic health emerges as a necessary response to these societal transformations. The conception of health is hence shifting from a dual dimension (physical and mental) toward a three-dimension model. Aesthetic Health stands now as a third dimension of health interacting dynamically with the other two, shaping our overall well-being. Rather than reducing beauty to mere appearance, this approach expands the perception of beauty as holistic, with interconnected dimensions within identity. It defines the intersection of mental wellness and physical appearance, fostering collaboration between mental health specialists and aesthetic practitioners to ensure safe, balanced, and optimal outcomes among patients.

The paradigm rests on 5 pillars:

- Physical Beauty, one dimension of our identity and values
- Acceptance of human physical imperfection essential to healthy identity development
- Monitoring Social media hygiene through varied exposure and algorithm awareness
- Balanced cosmetic consumption where good usage is a question of good dosage
- Morpho-responsible aesthetic interventions that respect the global harmony of the physical identity

This integrative approach addresses a society increasingly shaped by visual standards and digital influence — particularly for younger generations, where reality and “reels” merge.

THE CALL FOR COLLABORATION

The challenges imposed by societal change cannot be addressed by aesthetic

medicine alone. A multidisciplinary alliance is necessary — not as a referral pathway, but as integrated practice.

Aesthetic practitioners cannot be expected to become psychologists, but they can become psychologically informed. Psychology cannot address the aesthetic dimension alone — patients present to aesthetic practitioners first. Body Dysmorphic Disorder, with its 15-year average diagnostic delay, reminds us that these patients are “invisible” until crisis. They are the canaries in the coal mine, revealing what happens when society overestimate the aesthetic dimension.

FOR OUR CHILDREN – A WORTHY EVOLUTION

Children are the future of our nation. What we normalize today, they will inherit tomorrow. We do not want our children to fear aging as pathology, nor prevention to become a trap. We do not want the quest for perfection to become obsession with imperfection. We do not want youth fearing aging while losing the desire to live fully — afraid to grow, too stressed to live meaningfully. We do not want children feeling rejection because they do not fit the beauty norms surrounding them, nor seniors trying helplessly to look younger to fit societal and professional expectations.

We want children holistically empowered — with power of action over their world, improving their beauty inside and outside. We want freedom for our children and our seniors to develop secure and to age in harmony. We want beautiful faces, healthy bodies and minds, longer longevity with more empathy. Diversity instead of adversity. A beauty of empowerment, not domination. Our ideals must serve us — not enslave us. By adopting a holistic vision, we can promote a beauty that celebrates humanity instead of vanity, elevates rather than reduces and preserves the innocence of childhood.

A better world — not a bitter world

Steven Dayan, M.D., FACS, a facial plastic surgeon, has spent his career navigating (and shaping!) an ever-evolving landscape in aesthetic beauty, both technologically and culturally. Today, his work places as much emphasis on confidence and authenticity as it does on appearance.

Clio Cresswell, Ph.D., a mathematician, tells a parallel story from the world of mathematics. The Golden Ratio has long been perceived as alluring, but that landscape, too, has evolved. She now considers daily how current scientific analysis influences how we see things.

Two thinkers from distinct fields: will they clash, or discover unexpected common ground?

REGENERATIVE AESTHETICS

CHAIR: Pietro GENTILE / Co-CHAIR: Aris STERODIMAS / MODERATOR: Francisco LLANO

- History of bioregenerative medicine
- Regenerative aesthetics & advanced biostimulation -
Lifting-like effects through deep and superficial biostimulatory vectors
- The use of fat cells for facial rejuvenation: Renegeration and volumization -
What is really possible with fat cells?
- The future of regenerative aesthetics:
Peptides, exosomes, and bio-stimulation in clinical practice
- Recombinant polypeptide of collagen-1 chain.
An example of bioengineering, the future is already here!
- The GlowSculpt Method: A multi-layer combination therapy for natural facial regeneration and reverse aging
- A painless regenerative approach for alopecia:
Rose stem cell-derived exosomes and a botanical complex delivered via a pneumatic device
