Monaco Advanced Facial Aesthetic Masterclass

Part of AMWC Monaco

WEDNESDAY, 29 MARCH 2023

PRE-CONGRESS *Course*

ADVANCED FACIAL AESTHETIC MASTERCLASS

The Monaco Advanced Facial Aesthetic Masterclass is aimed at high level discerning doctors in aesthetic medicine. In-depth knowledge of **clinical facial anatomy combined with advanced injection techniques** ensure SAFE and optimal results in aesthetic medicine.

Two modules of the top ten clinically relevant Anatomic Zones will be the focus of each annual masterclass.

Lips & perioral region enhancing techniques will be the focus of the morning program and **neck & décolletage** will be covered in the afternoon.

Clinically relevant techniques relying upon ultrasound and cadaveric anatomy are mastered and demonstrated by top plastic surgeons who operate and see the live anatomy of facial tissues on a weekly basis. An eminent faculty of specialists have been selected to inject these focus zones and share the most relevant pearls and pitfalls aiming to safeguard and grow your aesthetic practice.

Carefully selected models with challenging features within the focus zones are selected with emphasis on cultural, ethnic and gender variations.

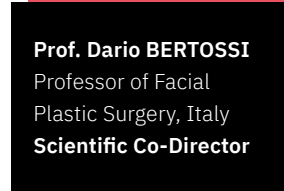

The lecture topics will be put into practice in the live show where paired injectors will have ample time to discuss surface anatomy, choice of filler and toxin, technique, precautions and after care.

The AMWC 2023 pre-congress course: Monaco Advanced Facial Aesthetic Masterclass, has been accredited by the European Accreditation Council for Continuing Medical Education (EACCME®) for a maximum of **7 European CME credits** (ECMEC®s).

NAVIGATING THE LANDSCAPE OF SELFIES, SOCIAL MEDIA, AND REALISTIC EXPECTATIONS AMONG AESTHETIC PATIENTS

Today the world is in a constant state of flux. Social media has become more than just a form of communication. It is central to most people's lives and connection to friends, family and colleagues. Thus, channels from Meta to TikTok have morphed into extremely influential platforms from practitioners and patients alike. In a post-pandemic world, it can be very tricky for many aesthetic patients to navigate these platforms and they may contribute the rise in mental health issues that is paramount across the globe. This diverse panel of physicians from the US, UK, and Middle East, will explore how social channels, selfies, and body image are impacting the patients who come to their practices. What are the key influences on aesthetic patients in today's market? How have these platforms changed the way aesthetic physicians practice? How may the onslaught of AI powered chatbots affect the way patients communicate and manage their expectations?

This panel shall explore the good, the bad and the ugly side of social media and discuss the key strategies to manage patients in this ever-changing world of digital media.
